

SHUBHAM PANDEY

Data Analyst | BI Analyst | Energy Analytics

shubhampandey11aug@gmail.com | +91-9794963499 | [linkedin.com/in/shubhampandey08](https://www.linkedin.com/in/shubhampandey08)

PROFESSIONAL SUMMARY

Skilled professional with hands-on experience in Renewable Energy Forecasting and Scheduling, Open Access, Data Analysis, and Power Trading, focused on supporting RE generators. Expertise in DSM Accounting and Settlement with a proven track record of ensuring regulatory compliance and maximizing energy yield. Currently seeking to transition from a service-based role to a core position with a renewable energy generator/developer to contribute more directly to green energy growth and learning new technologies (Battery Energy Storage Systems (BESS), Green Hydrogen).

CORE SKILLS

Power BI & Data Visualization | Python (Pandas, NumPy) | SQL (Data Extraction & Transformation) | Advanced Excel (Power Query, Pivot Tables) | Data Cleaning & Data Modelling | KPI Development | ETL / Data Pipelines | Workflow Automation | Business Intelligence & Reporting | Data Storytelling | Stakeholder Management | Energy Market Analytics (DSM, Forecasting, Open Access, Regulatory, Asset Management, Captive Management, Power Trading)

TECHNICAL STACK

- Languages: **Python, SQL (Intermediate)**
- Tools: **Power BI, Excel, Power Query, PowerPoint**
- Platforms: **Microsoft Fabric (Learning – DP-600, DP-700 in progress)**
- Concepts: **Data Modelling, ETL/ELT, Data Pipelines, KPI Design, Dashboarding**
- Domain Tools: EMS, SCADA, ETAP, PV-Syst, Autocad, Matlab

PROFESSIONAL EXPERIENCE

Gentari India, Gurgaon

Sep 2025 – Present

Assistant Manager – Analytics (Energy & Market Operations)

- Leading **data-driven forecasting & scheduling operations, Open Access** for wind & solar assets using real-time datasets
- Developed analytical approaches to **track KPIs, identify performance gaps, and improve asset efficiency**
- Managing **DSM analytics & deviation data**, enabling better financial optimization
- Collaborating with stakeholders to **translate operational data into actionable business insights**
- Driving **process improvements and data standardization initiatives**
- Exploring **modern data platforms like Microsoft Fabric** for scalable analytics solutions
- Coordinate and manage captive power allocation for Open Access projects, ensuring timely allocation, regulatory compliance, and operational efficiency
- Track and interpret regulatory updates pertaining to Energy Banking, Forecasting & Scheduling, Open Access, and Grid Connectivity, ensuring adherence to applicable regulations and procedures

Kreate Energy, New Delhi

Nov 2019 – Aug 2025

Deputy Manager – Energy Analytics & Trading

- Built and maintained **Power BI dashboards** tracking generation trends, forecast accuracy, DSM impact, and revenue
- Automated reporting workflows using **Power Query**, reducing manual effort by **30%**
- Analyzed large datasets (50+ GW portfolio) to **improve forecasting accuracy by 15%**
- Developed data-backed strategies for **power exchange bidding (IEX)**
- Performed **data cleaning, validation, and transformation** across multiple systems
- Delivered insights via **dashboards, reports, and presentations** to technical and business teams
- Improved workflows and operational efficiency, increasing productivity by **15%**
- Managed **end-to-end data lifecycle – collection, processing, analysis, reporting**

NTPC / IOCL Projects (NBPPL & EIL)

2017 – 2019

Project Engineer (Contract)

- Contributed to large-scale projects, gaining exposure to **data, operations, and reporting processes**

Wind World India Ltd., Mumbai

Jul 2013 – May 2016

Assistant Engineer – Wind Operations

- Used data analysis to improve wind farm productivity by **25%**
- Created MIS reports and conducted **trend analysis, benchmarking, and root cause analysis**
- Worked with operational systems for **data monitoring and performance tracking**

PROJECT HIGHLIGHTS

- Developed **Power BI dashboards** for tracking energy generation, DSM impact, and financial performance
- Automated reporting pipelines using **Excel (Power Query)**
- Performed **trend analysis, KPI tracking, and forecasting improvements** using Historical datasets
- Built data-driven insights to support **operational and business decision-making**

EDUCATION

B.Tech – Electrical & Electronics Engineering2008 – 2012

Gautam Buddha Technical University

CERTIFICATIONS & CURRENT UPSKILLING

- Preparing for **Microsoft DP-600 (Fabric Analytics Engineer) & Microsoft DP-700 (Fabric Data Engineer Associate)**
- Hands-on learning of **Microsoft Fabric – Dataflows, Lakehouse, Pipelines, Power BI integration**
- Learning **Data Engineering concepts – ETL/ELT, Medallion Architecture (Bronze/Silver/Gold layers)**
- Planned upskilling: **Microsoft Fabric, Databricks (Spark, Data Pipelines, Lakehouse architecture), GEN AI**
- Data Analytics Certification – INSAID (**Python, Statistics, Data Visualization, ML basics**)
- Electrical Design – AEDEI

ACHIEVEMENTS

- Achieved **30% cost reduction** through process automation
- Improved forecast accuracy by using data-driven approaches
